## Growing Our Logistics TEAM!

I hope you are starting off 2019 on a positive note, despite the soggy weather. There are a lot of things happening at Global Net Logistics that have us excited about 2019! We have expanded our brokerage division and have added Kameron Burris as Director of Logistics. Kameron brings over 37 years of trucking experience with him. We have added to our available truck capacity and have focused more on building our trucking relationships. Over the past 6 months our brokerage division has more than doubled in size giving us the ability to give our customers a more responsive line of communication and a customized customer service experience! With these changes we have given our team a combined total of 70 years dispatching trucks and building relationships with loyal customers.

## What's New in Freight Forwarding at Global Net?

GNL is also proud to say that our Forwarding side is rocking n rolling with Michael Laake as Director of Forwarding. With the forwarding staff doubled we are able to put passion and added substance behind our overall customer service experience, thus strengthening the relationships with our global partners. Our main goal is to help you grow your business with clear communication and personalized routing services so that you have more time to focus on your business. With a combined 111 years of experience, we are confident our forwarding department can meet and exceed customer expectations.

## Our Driving Team Experience!

As if that's not enough, there is more! We are starting the new year with additional capacity in our local pick up and delivery fleet, and have staffed with additional driving personnel. This gives our driving team a combined total of 47years experience all over DFW and the airports!

## Simplifying you're Storage Needs

This growth has facilitated our need to move into a larger facility, and we are finishing out our new home to be able to be moved into on April 1st of 2019. At that time GNL will also have an additional 17,000sq feet of available storage in our new facility.

## Give Global Net you're Feedback

Working with Global Net Logistics is a partnership whether it be multi-modal freight, warehousing or supply-chain management, on freight across town or across the world. The end result is a global logistics partner that saves you time and money and where your success is our success. We would like to thank you for allowing us to be your Global Freight transportation provider. We would like to hear how we are doing, and if there is anything we can do differently that will make us better. We would appreciate feedback so that we can make sure you are 100% satisfied with our service. We understand that every customer is different and want to make sure we deliver on your unique requirements.
